Easy order Print Ver 4.x.x
Quick Installation steps for Woo Commerce

Easy Order Print is a simple application that sends newly created WooCommerce orders directly to a Thermal Printer or <u>any other printer.</u>

For testing you can use **PDF Virtual printer**
Note: Application use the <u>Default printer of your system</u>

1. UnZip the file **Easy_Order_Print_woo_vx.x.x.zip**

    You will get the application Easy Order Print and Word Press plug in

2. Install the plug in at your Word Press – Woo Commerce need to be installed

3. Go to menu Setting → EasyPrint and get your API **Token** (You are able to Change it)

4. Run the application by using Easy Print.exe and Press **settings**

5. Put there your API **Token** and your Word Press **REST API endpoint**

    Rest API endpoint → https://my-word-press.com/**wp-json**/**easyprint**/**orders**
