Easy order Print
Quick Installation steps

Easy Order Print is a simple application that send any new order of your Cs-Cart directy to any Thermal Printer or to any other printer.

1. UnZip the file **Easy_Order_Print_x.x.x.zip**

2. Up load the folder **easy-print-cs-cart-0000000** at your root of your cs-cart installation.

For example if your shop is at **https://my-cs-cart-shop.com,** then upload the folder **easy-print-cs-cart-0000000** at the **https://my-cs-cart-shop.com/easy-print-cs-cart-0000000**

3. Open the **file connect_pdo.php** and put the correct credentials, so the script will be able to connect to **cs-cart** database.

Your php version need to support **pdo** connections

```php
1  <?php
2
3  //CHAnge THE E-MAIL - You can get database connections issues notificatios
4  $mailto = "ep_notifications@sipware.eu";
5
6  //Cs-Cart Shop Data Base Connection
7  $host = 'localhost';
8  $user = 'USERNAME';
9  $pass = 'PASSWORD';
10 $db   = 'CS-CART-DB';
11 $charset = 'utf8';
12
13
```

4 .If your **default language** of your cs-cart is not **english (en)** then edit the the file **check_for_order_pdo.php**. Put the correct language code by changing the value: *$lang_code_of_product = "en";*

You can replace the **en** with your default language code of your cs-cart, for example **de,gr,kr** etc

```php
24
25
26 $orders_table = "cscart_orders" ; //Table with orders in cs-cart
27 $order_details_table = "cscart_order_details"; //Table with details in cs-cart
28 $product_descriptions_table = "cscart_product_descriptions"; //Table with product descriptions and name
29 $lang_code_of_product = "en";
30 $order_data = "cscart_order_data";
31 $payments_table = "cscart_payments";
32 $payment_descriptions = "cscart_payment_descriptions";
33 $company_id = 1; //37;//Company ID you can get it at table cscart_companies
34
```

5. The folder **Easy_Order_Print_vxxx** includes the application (for windows). You can start the application by **Easy_Order_Print.exe**

application going to work as demo until you put a valid license key. Using the the "Registration" button.

6. You need to go to setting (Settings Button).
There first thing you need to do is to put the correct **Shop url** and the correct **Script Password**

As Shop url you need to put the :
http://my-cs-cart-shop.com/easy-print-cs-cart-0000000/check_for_order_pdo.php

You need to put **http and not https**

As Script Password you need to put : **123456789**

   (this should be the same as the **$connection_password** value in the the **check_for_order_pdo.php**

7. Any modification you do you need to press **Save Setting**

9. Application should be able to get new order **Open Orders** from your cs-cart installation and to print in the default printer of your system

You can use a virtual pdf printer for testing
http://www.pdfill.com/.

You can buy a license from here:

https://sipware.eu/non-sip-products/easy-print-your-order-directly-to-your-printer

10. Security

For security Reasons
a. Change the default password of the **Script Password**
b. Change the folder **easy-print-cs-cart-0000000** to any other name. For example you can make it

easy-print-cs-cart-xyzxyzxyz
